

Job Description: Architect/ Lead Engineer – Enterprise Applications

An ideal candidate will have hands on coding experience in Java/JavaScript and strong background in Application Development and Integration, be very interested in solving hard problems and providing innovative solutions, enjoy a start-up environment, and bring creative energy to their work.

As a leading member of the software engineering team, you will,

- Be responsible for designing and developing software for an IoT Integration platform to implement and interoperate with various ERP & Telecom OSS/BSS applications.
- Provide technical leadership for implementation and refinement of new features and products.
- Analyze and troubleshoot complex technical situations and propose creative, effective solutions that fit technology roadmap and strategy of the company.
- Conduct design and code reviews to comply with best practices, standards and factors including extensibility, maintainability, performance and security.
- Interacting closely and effectively with other teams such as Sales/Marketing, Product Management, QA, and Documentation in ensuring eventual success of the solution.
- Mentor junior team members.

Required skills:

- Comprehensive hands-on experience in Java, JavaScript, J2EE, REST, Unix Shell scripting.
- In-depth experience in Ecommerce or Telecom B/OSS domain, working with Inventory, Manufacturing, Billing & Rating, Settlement, Order & Service Management Systems, etc. for service providers or E-commerce.
- Strong understanding of Quote to Cash process and work-flows that implement it.
- Experience developing and configuring ERP applications from Oracle, SAP, Netsuite, Salesforce, OfBiz, Odoo, Amdocs etc.
- Experience working with UI frameworks and stacks, including ReactJS and AngularJS
- Proven experience with RDBMS and NoSQL databases; excellent SQL, PL-SQL skills
- Excellent understanding of OOD, EAI & architecture design patterns, system architecture principles, middleware.
- Knowledge of Virtualization and Cloud technologies (VMWare, KVM, Dockers etc.) is preferable.
- Experience in designing and developing high volume web services using API Protocols and Data Formats (REST, JSON, SOAP & XML), Application servers & Messaging middleware (Kafka, JMS/MQ, ActiveMQ, SonicMQ, etc.) & in EAI products from WSO2, TIBCO, IBM, Oracle, MuleSoft, etc. a big plus.
- Excellent software troubleshooting and debugging skills
- Ability to work with team of engineers/architects (local and/or off-shore) in a dynamic workplace.
- Strong verbal & written communication skills.

Qualification:

- Bachelor or Master Degree in Computer Science/Engineering or equivalent.
- At least 10+ years' experience in ERP/Ecommerce/Telecommunication industry as a hands-on software developer & lead.

Location: India and USA
